

BUSINESS GUIDE

Everything your business needs, explained in plain language

A walkthrough of every module in Pesaa — sales, inventory, accounting, HR, purchasing, manufacturing, reports, and the mobile app — with real screenshots, written for business owners and their teams, not developers.

What is Pesaa?

Pesaa is an all-in-one business management platform. Instead of running your sales register, your stock spreadsheet, your accounting book, and your staff records as separate, disconnected tools, everything lives in one place — and every action updates everywhere else automatically.

A sale at the till reduces stock, records revenue, and updates your accounts — all in the same instant, with no one re-typing the same number three times. That is the whole idea behind Pesaa: one accurate source of truth for your business, accessible from a computer at your back office or a phone at the counter.

Point of Sale

Inventory

Accounting

HR & Payroll

Purchasing

CRM

Manufacturing

Reports

Mobile App

Who it's for: a single-location shop owner ringing up sales alone, all the way to a multi-branch business with a full back-office team. Every module below is optional — turn on what your business needs today, and add the rest later without changing systems.

In this guide

01	Getting Started	Signing up, setup time, how accounts work
02	Dashboard & Reports	Your business at a glance, live
03	Sales & Point of Sale	Checkout, receipts, deals pipeline
04	Inventory Management	Stock, warehouses, alerts, transfers
05	Accounting & Invoicing	Books that update themselves
06	Purchases & Suppliers	Requisitions to supplier bills
07	HR & Team Management	Employees, attendance, payroll, departments
08	Manufacturing	For businesses that make what they sell
09	Data Entry & Forms	What adding a record actually looks like
10	Mobile App	Sell and manage from your phone
11	Security & Multi-Branch	Data isolation, locations, team roles
12	Plans & Pricing	What's included at each tier

Set up in minutes, not weeks

There is no installation, no IT visit, and no training course required to get moving.

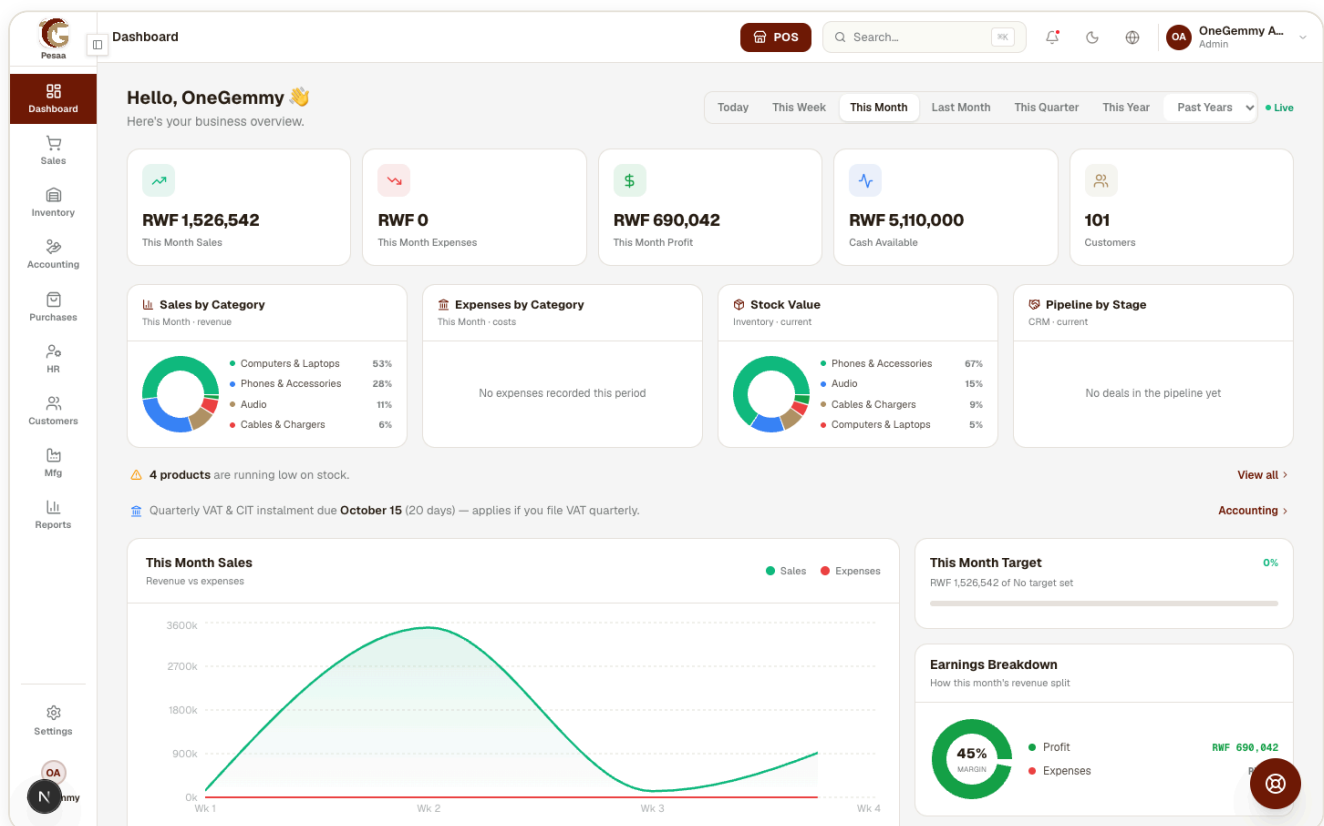

- ✓ **Create an account** — pick a business name, a country/currency, and you're in. No credit card required for the Free plan.
- ✓ **Your business starts with sensible defaults** — six standard departments (Sales, Finance, HR, Operations, Marketing, Customer Service) are ready on day one; rename or replace them anytime.
- ✓ **Invite your team** — add employees with a role (Owner, Manager, Sales Staff, Inventory Staff, and more), and they only see what their role allows.
- ✓ **Start selling immediately** — the Point of Sale screen works the moment your first product is added; no separate "go live" step.

Multi-tenant by design: every business on Pesaa is completely isolated from every other — your sales, stock, staff, and reports are never visible to, mixed with, or reachable by any other account on the platform.

02 · DASHBOARD & REPORTS

Your business, at a glance

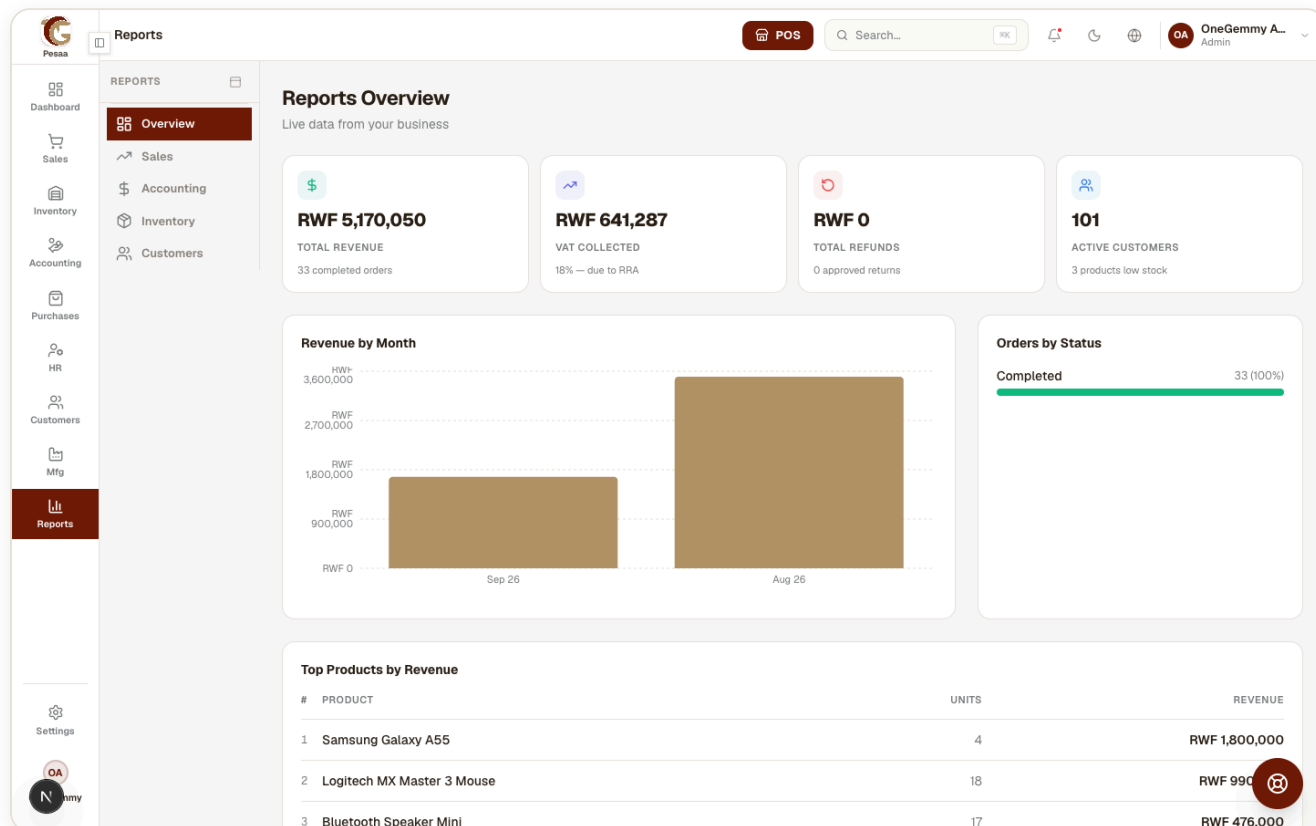

The moment you log in, you see today's numbers — not yesterday's export, not a report someone has to run.

The dashboard: sales, expenses, profit, cash on hand, category breakdowns, and low-stock warnings — live.

Reports that answer real questions

Beyond the dashboard, the Reports module answers the questions an owner actually asks: what sold, what's owed in tax, and what's running low.

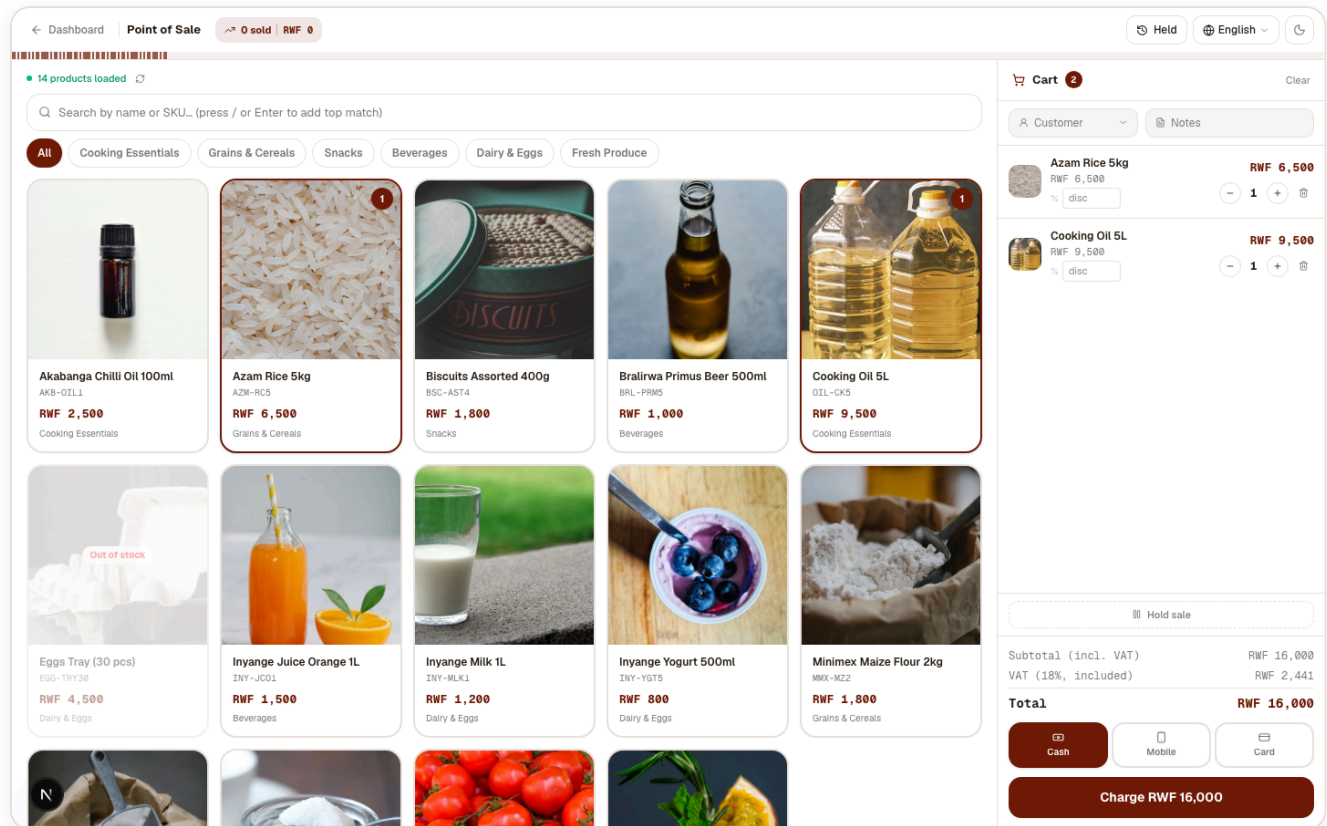

Revenue by month, VAT collected, orders by status, and top products by revenue — all computed from real transactions, not a spreadsheet someone maintains separately.

- ✓ **Sales, Accounting, Inventory, and Customer reports**, each with their own detail view and date filters.
- ✓ **VAT collected** is tracked automatically at 18%, matching Rwanda's tax rules, ready for filing.
- ✓ **Top products by revenue** — see what's actually driving your business, not just what's selling in volume.

A checkout built for a real line at the counter

Search or scan a product, take payment, done. Works on any browser — no special till hardware required.

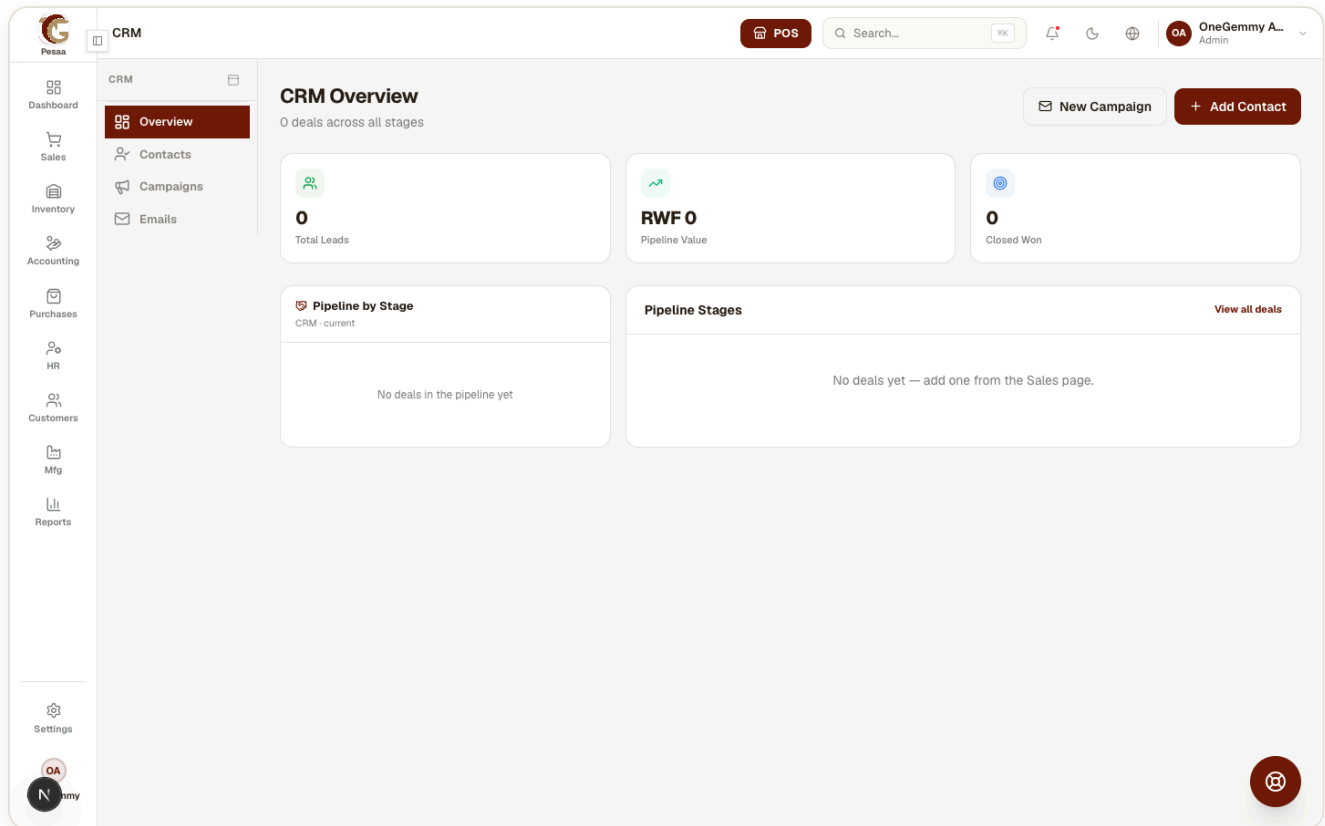

The Point of Sale screen — cart on the right, products on the left, one tap to charge.

At checkout

- ✓ Cash, mobile money, or card, in one flow
- ✓ Hold a sale and come back to it later
- ✓ Every sale updates stock and the books instantly
- ✓ Branded, printable receipt with your logo

Never lose track of a lead

A visual pipeline from first contact to closed deal, with quotes, commissions, and targets built in — so your whole sales team works from one source of truth.

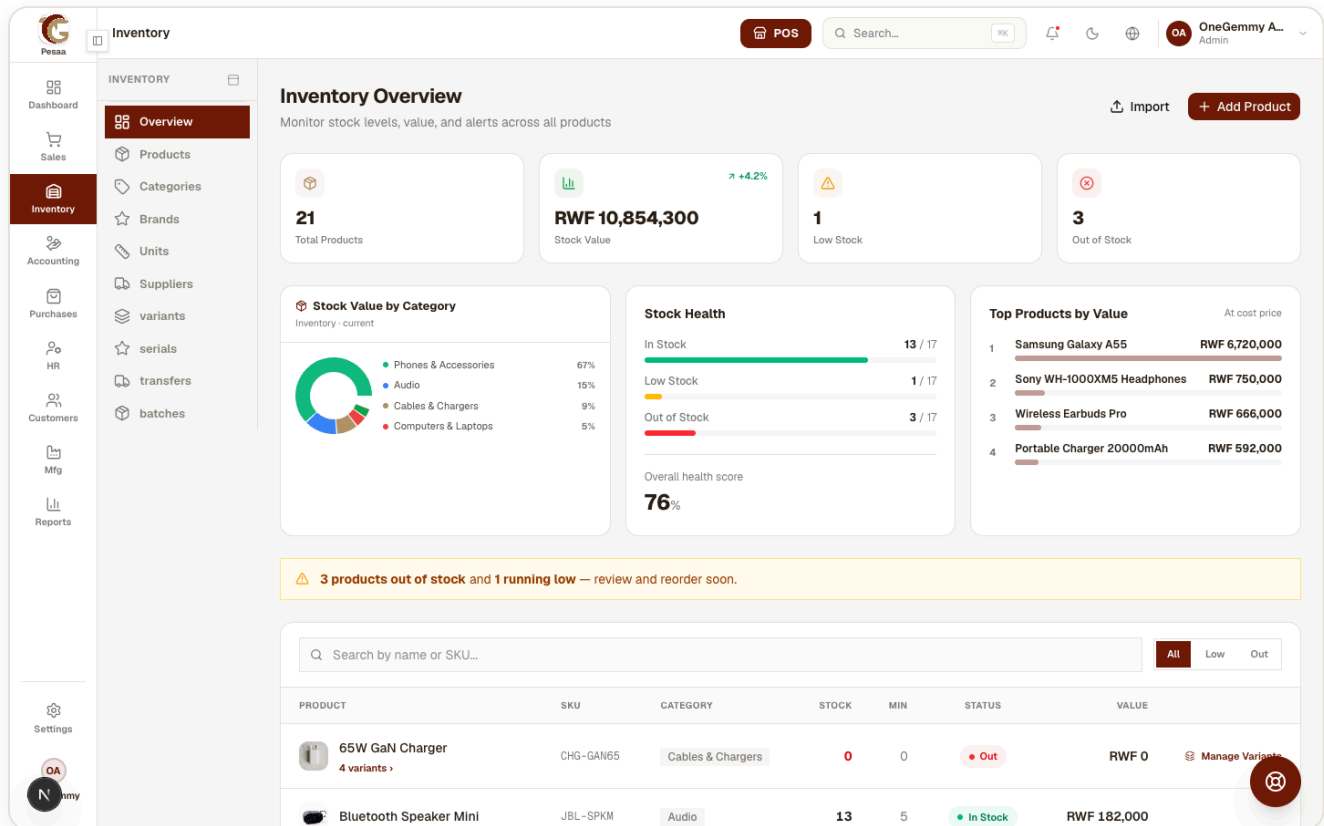

CRM overview — leads, pipeline value, and deals by stage, alongside contacts and campaigns.

- ✓ Visual deal pipeline from lead to closed sale
- ✓ Quotes, commissions, and team targets
- ✓ Full customer purchase history in one place
- ✓ Email campaigns to your customer list

Know exactly what's in stock, everywhere

Every sale, purchase receipt, and return moves the same number — so the count on the screen matches what's actually on the shelf.

Inventory overview — stock health, low-stock alerts, and value by category.

- ✓ **Multi-warehouse tracking** — know what's on hand at every location, not just one combined total.
- ✓ **Low-stock alerts** — get warned before you run out, not after.
- ✓ **Batch, serial, and variant support** — track expiry dates for pharmacy/cosmetics stock, serial numbers for electronics, and size/color variants for fashion.
- ✓ **Stock transfers** — log stock moving from one branch to another, with a full paper trail of who sent what, when.
- ✓ **CSV/Excel bulk import** — bring in your existing product list in minutes, not one row at a time.

Books that stay up to date on their own

No manual reconciliation, no surprises at month end — every sale and purchase already lives in your accounts the moment it happens.

The screenshot shows the 'Invoices' section of the Pesaa Accounting software. The interface includes a sidebar with navigation options and a main content area. The main area displays a summary of invoices and a table of individual invoices.

Summary Cards:

- TOTAL INVOICED:** RWF 5,170,050 (33 Invoices)
- COLLECTED:** RWF 5,170,050 (33 paid)
- OUTSTANDING:** RWF 0 (0 awaiting payment)
- AVG. INVOICE:** RWF 156,668 per invoice

Filters: All (33), Pending, Paid (33), Cancelled

Search: Search invoice or customer...

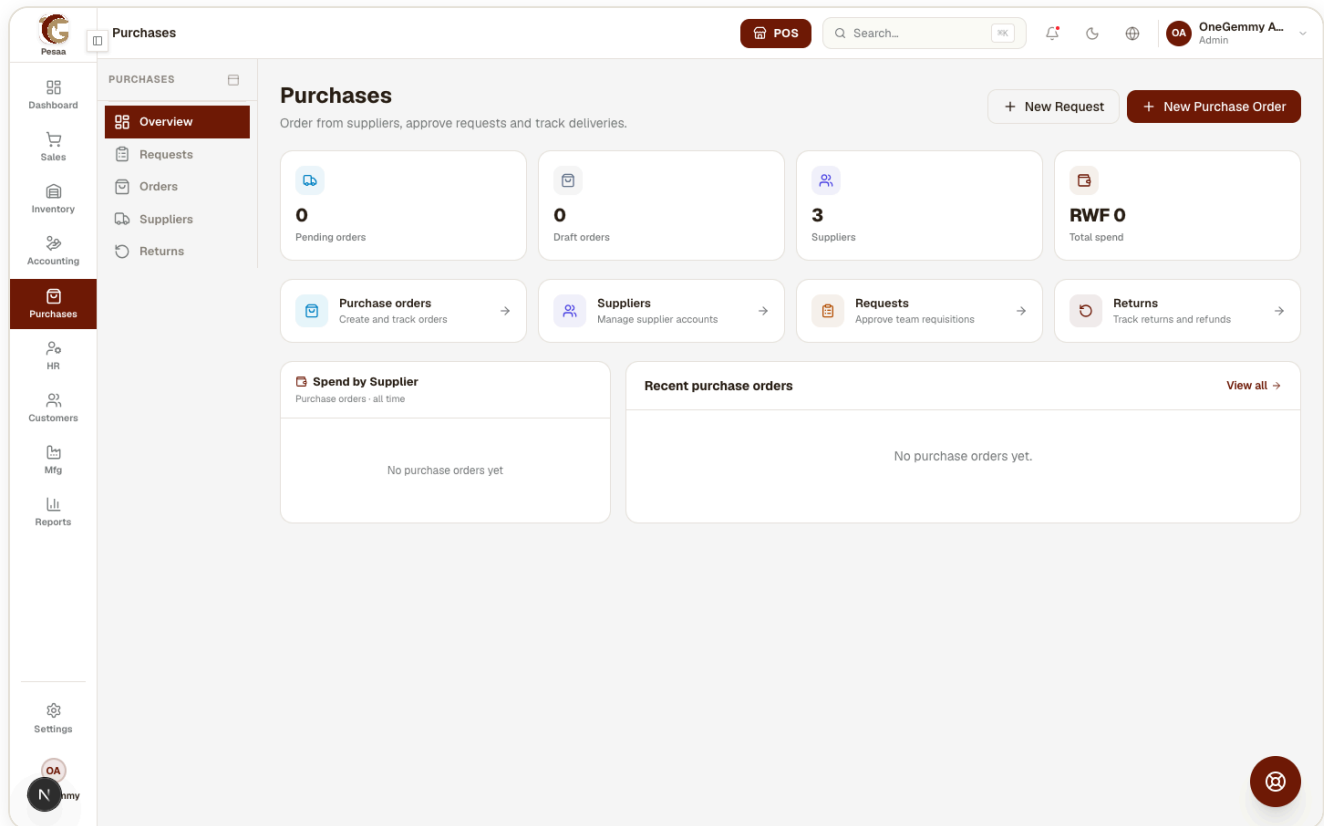

INVOICE	CUSTOMER	DATE	ITEMS	AMOUNT	STATUS	ACTIONS
ORD-0033 Order	—	24 Sept 2026, 16:12	2 items	RWF 77,000	PAID	[Icons]
ORD-0032 Order	—	24 Sept 2026, 15:50	2 items	RWF 77,000	PAID	[Icons]
ORD-0031 Order	—	24 Sept 2026, 15:48	2 items	RWF 77,000	PAID	[Icons]
ORD-0030 Order	—	24 Sept 2026, 15:28	2 items	RWF 83,000	PAID	[Icons]
ORD-0029 Order	—	24 Sept 2026, 15:20	2 items	RWF 77,000	PAID	[Icons]
ORD-0028 Order	—	24 Sept 2026, 15:19	2 items	RWF 77,000	PAID	[Icons]
ORD-0027 Order	—	24 Sept 2026, 15:19	2 items	RWF 77,000	PAID	[Icons]
ORD-0026 Order	Beatrice Kabera	24 Sept 2026, 13:55	12 items	RWF 702,000	PAID	[Icons]

Every invoice, its status, and whether it's been paid — generated automatically from your sales.

- ✓ **Branded invoices** — every invoice carries your business logo and brand color, automatically, for every customer.
- ✓ **VAT handled correctly** — prices are VAT-inclusive ($\text{net} = \text{gross} \times 100/118$), matching how Rwandan businesses actually price things, so your revenue and your tax filings agree.
- ✓ **Expense tracking, chart of accounts, and journal entries** for a full accounting picture, not just a sales log.
- ✓ **Real-time profit & loss** — always current, never a report you have to remember to run.

From request to paid bill, in one flow

Raise a purchase order, receive the goods, and the bill it creates is tracked through to payment — so you always know what you owe, and to whom.

The Purchases overview — pending orders, supplier count, and total spend, all in one screen.

The flow

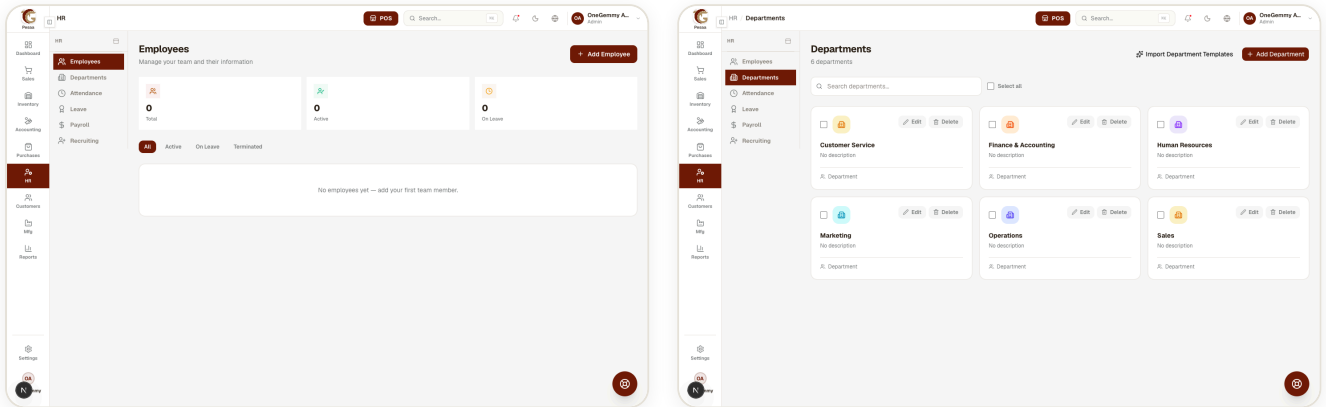

- ✓ A staff member raises a **Purchase Request**
- ✓ A manager approves it into a **Purchase Order**
- ✓ Goods arrive and are **received into stock**
- ✓ A **supplier bill** is tracked to payment

Also included

- ✓ A full supplier directory with contact details
- ✓ Purchase returns, tracked separately from sales returns
- ✓ Spend-by-supplier reporting

Your team, without a separate HR tool

Attendance, leave, and payroll for your team, tracked alongside the rest of the business instead of in a tool nobody logs into.

Employee records on the left; department management on the right — every business can organize its own team structure.

- ✓ **Employee directory** — job title, department, hire date, and salary in one record.
- ✓ **Attendance & leave** — clock-in tracking and leave requests with approval.
- ✓ **Payroll** — run pay for your team directly from the same system that tracks their attendance.
- ✓ **Departments you manage yourself** — start from six sensible defaults, or import a template suited to your industry (Retail, Manufacturing, Healthcare, Hospitality, and more).
- ✓ **Recruiting** — track applicants through hiring stages.

For businesses that make what they sell

Bills of materials, work orders, and output tracking — for producers, not just resellers.

Recent Work Orders [View all](#)

Work Order ID	Work Order Name	Quantity	Status
WO-0002	Widget Order 2	3	Draft
WO-0001	Test Widget Order	2	Draft

Manufacturing overview — work orders in progress, and what each one produces.

- ✓ **Bills of materials** — define what components go into each product you make.
- ✓ **Work orders** — plan and track production runs from start to finish.
- ✓ **Materials consumption** — see exactly what a production run used from stock.
- ✓ **Production analytics** — output and completion trends over time.

This module sits alongside Inventory and Accounting — when a work order completes, finished goods are added to stock and the materials consumed are deducted, automatically.

Simple forms, not spreadsheets

Every record in Pesaa — a product, a sale, an employee, an order — is added through a short, focused form. No blank spreadsheet cells to figure out, no required fields you can't see.

Add Product — Inventory

New Order — Sales (becomes an invoice automatically)

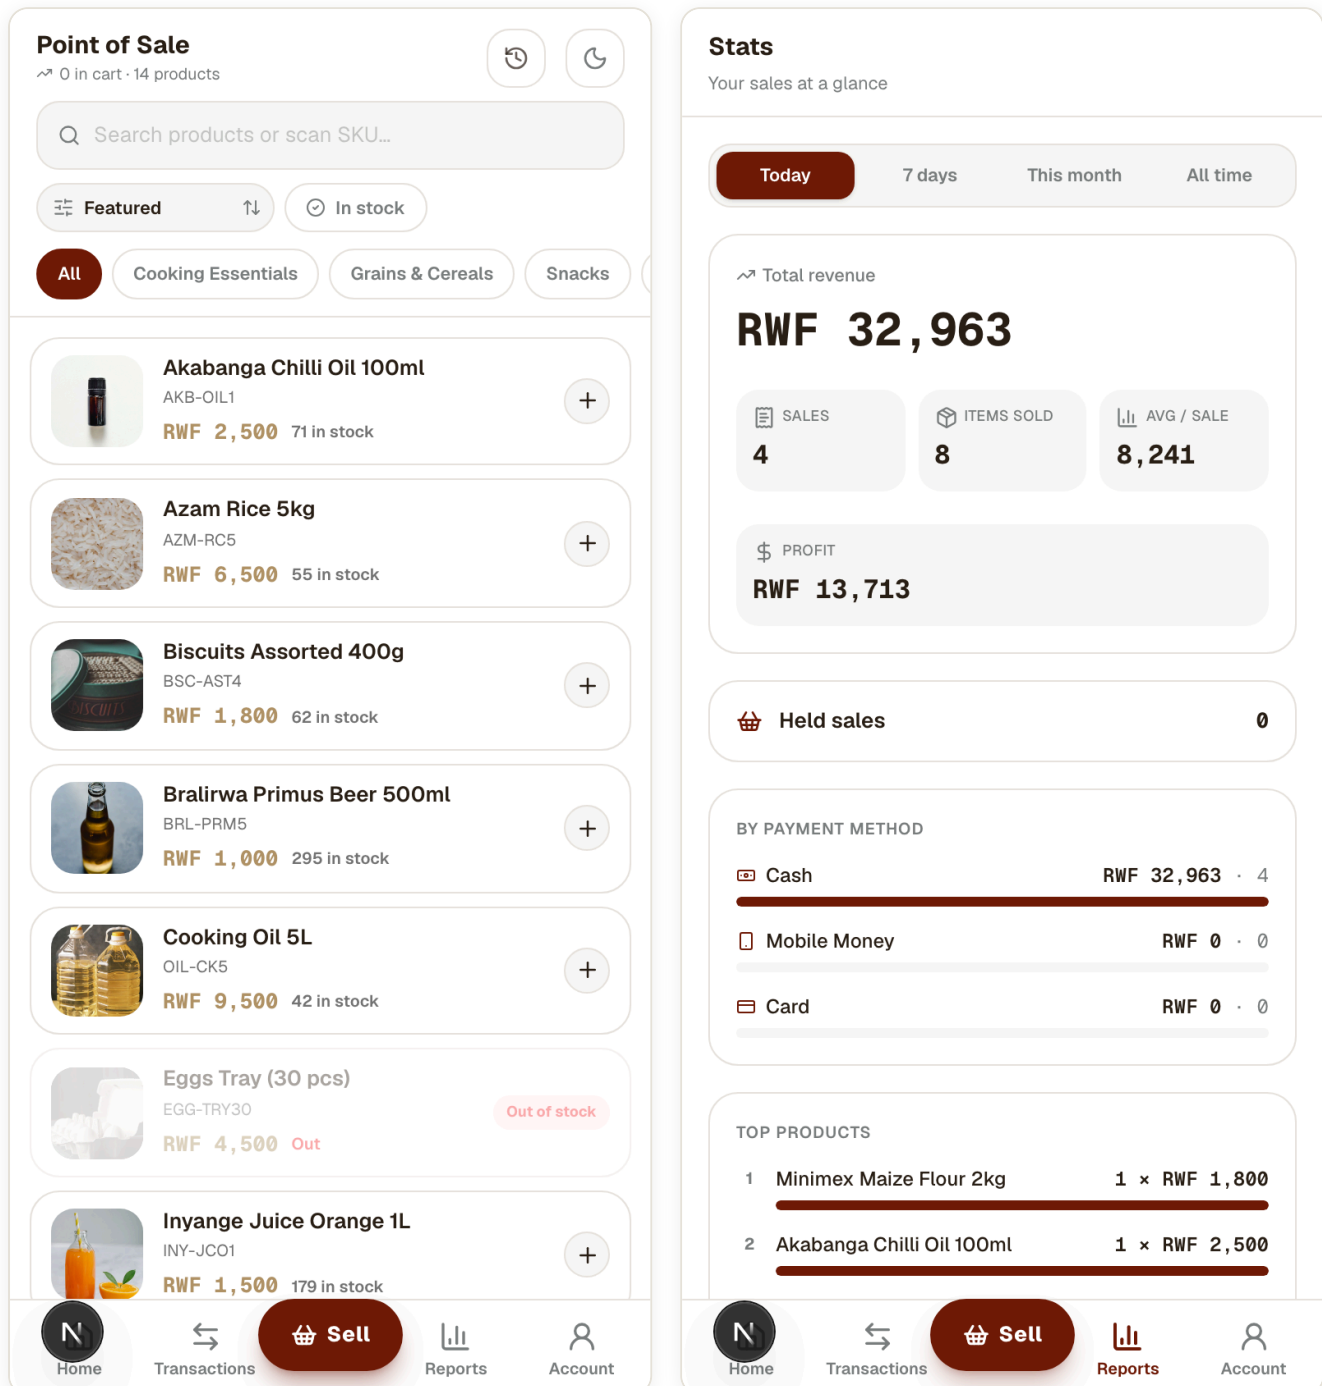

New Purchase Order — Purchases

Add Employee — HR

Add Department — HR (or import a template instead of typing)

Sell and manage from your phone

A dedicated mobile app — not a shrunk-down website — handles checkout, stock, and daily sales, in sync with the web dashboard in real time.

- ✓ **Two-tap checkout** — add a product, tap Charge for exact cash. That's the whole flow.
- ✓ **Works offline** — sales made without a connection are queued and sync automatically once you're back online.
- ✓ **Everything the web app has** — purchases, inventory, customers, suppliers, and expenses, reachable in two taps or fewer.
- ✓ **Same account, same data** — nothing to re-enter; the phone and the desktop are always looking at the same numbers.

Built to scale from one counter to many

The same account that works for a single shop owner works for a business running several locations and a full back-office team.

Multi-branch

- ✓ Add as many branches/locations as your business needs
- ✓ Every sale and every employee is tagged to a branch
- ✓ Stock transfers logged between locations

Team & roles

- ✓ Granular permissions — a cashier and an accountant see different things
- ✓ Invite unlimited team members on paid plans

Data protection

Registered Data Controller/Processor with Rwanda's National Cyber Security Authority.

- ✓ Every business's data is fully isolated to its own account
- ✓ Encrypted in transit (HTTPS/TLS) end-to-end
- ✓ Export your data at any time — no lock-in

Plans that scale with your business

Start free, and upgrade only when you actually need to. No setup fees on any plan.

PLAN	BEST FOR	INCLUDED
Free	A single-location owner-operator getting started	Core dashboard, up to 2 users, core business modules, no credit card required
